

Breaking Ground in West Chicago.

DuPage & Chicago South Suburbs Habitat for Humanity is proud to launch its newest affordable housing development in West Chicago. As we celebrate 30 years of impact in DuPage, this project brings our work full circle back to the community where we built our first home. This project creates 12 safe and affordable new townhomes for limited-income families through Habitat's Homeownership Program.

Project Overview

- Construction will take place over four years, with three homes built annually.
- Homes are built with volunteer labor and corporate support to foster an inclusive and welcoming community.
- Habitat families contribute sweat equity and purchase their homes through affordable mortgages.
- The development will transform 2.75 acres of previously undeveloped land into a thriving neighborhood.

Community Need

57.4%

of renters are cost-burdened, spending more than 30% of their income on housing.

69%

of West Chicago school age families are classified as low-income.

Building More Than Homes

Transforms lives through the power of homeownership.

Strengthens local economy and contributes to a stronger community.

Families gain stability and build generational wealth.

Celebrating the past.
Building the future.
